PROFIL

- React va TypeScript asosida toza, qayta ishlatiluvchi va miqyoslanuvchi veb-ilovalar yaratishga ixtisoslashgan frontend dasturchi.
- Komponentlar arxitekturasi, holatni boshqarish (Redux Toolkit, Zustand, TanStack Query) hamda REST va Firebase API'lar bilan integratsiyada amaliy tajriba.
- TailwindCSS, MUI va Bootstrap yordamida piksel darajasida aniq, responsiv interfeyslar; Framer Motion va GSAP bilan silliq animatsiya va interaksiyalar.
- Monorepo arxitekturasida amaliy tajriba: veb va mobil ilova bitta kod bazasi va umumiy design-token tizimidan chiqadi (Turborepo, pnpm/npm workspaces).
- Real vaqt rejimidagi ilovalar, autentifikatsiya tizimlari va admin panellarni noldan to‘liq ishlab chiqish bo‘yicha tajriba.

ASOSIY YO‘NALISHLAR

Komponent arxitekturasi · Holatni boshqarish · Monorepo (Turborepo) · Responsiv dizayn · Performans optimizatsiyasi · UI / UX implementatsiyasi · Animatsiya va interaksiya · REST & Firebase integratsiyasi · Avtomatik deploy (CI/CD)

TAJRIBA

Frontend Developer — Freelance

Sentyabr 2025 — hozirgacha · Qo‘qon

- Mijoz talablariga mos pixel-perfect interfeyslarni HTML, CSS, JavaScript va React yordamida ishlab chiqdim.
- Firebase (Auth, Firestore, Storage) integratsiyasi orqali real vaqt rejimida ishlovchi funksiyalarni joriy etdim.
- Framer Motion yordamida foydalanuvchi tajribasini yaxshilovchi animatsiya va o‘tishlarni qo‘shdim.

Mustaqil loyihalar — GitHub

2025 — hozirgacha

- 26 ta ochiq repozitoriy: veb-ilovalar, React Native mobil ilovalar va Telegram botlar.
- Monorepo arxitekturasini amalda o‘zlashtirdim — veb va mobil ilova bitta kod bazasi, TanStack Query bilan server holati, Turborepo bilan build orkestratsiyasi.

LOYIHALAR

ATOYO Santexnika — E-commerce platformasi `ILOVA + VEB`

Monorepo

`Next.js 16 · React Native · Firebase · Redux Toolkit · Telegram Bot API`

atoyo-uz.netlify.app · github.com/Abdulmajidkhan007/atoyo-e-commerce

- Bitta repoda ikkita mahsulot: Next.js sayti va React Native ilovasi (com.atoyo); release APK GitHub Actions'da typecheck va lintdan o‘tgandan keyin yig‘iladi.
- 10 000+ mahsulotli katalog: cursor-based pagination, infinite scroll, kompozit indeksli filtrlar va typo-tolerant qidiruv (Firestore prefiks + Fuse.js).
- Telegram bot integratsiyasi — har bir buyurtma guruhning tegishli forum topic’iga boradi, inline tugmalar webhook orqali Firestore statusini yangilaydi.
- Rolga asoslangan admin panel va ikki qatlamli himoya (proxy + layout darajasida mustaqil qayta tekshiruv).

KidsWear — Bolalar kiyimi platformasi ILOVA + VEB

Monorepo

`React Native (bare CLI) · React + Vite · Firebase · Turborepo · Redux Toolkit · i18next`

github.com/Abdulmajidkhan007/rn-r-e-commerce

- Veb va mobil ilova bitta monorepodan chiqadi: UI har platforma uchun alohida, lekin yagona design-token tizimi bilan boshqariladi.
- Cloud Functions bilan tranzaksion zaxira kamaytirish, FCM push bildirishnomalari (ikkala platformada) va biometrik AppLock.
- Uch tilli interfeys (uz/en/ru), Google Sign-In va rolga asoslangan admin panel.

Organick — Organik oziq-ovqat platformasi

Veb

`React 19 · TypeScript · Redux Toolkit · Tailwind v4 · Firebase · i18next`

github.com/Abdulmajidkhan007/Organick_org

- To‘liq onlayn-do‘kon: kategoriya bo‘yicha filtrlash, qidiruv va saralash, reyting tizimi, localStorage’da saqlanuvchi savatcha (slide-in sidebar + alohida sahifa).
- Firebase autentifikatsiyasining uch usuli — Google Sign-In, Email/parol va telefon orqali SMS OTP; himoyalangan admin dashboard (mahsulot va blog uchun CRUD).
- i18next bilan 3 tilli interfeys, dark/light rejim va mobil-birinchi responsiv dizayn.

Lumina — Ijtimoiy tarmoq ilovasi ILOVA + VEB

Monorepo

`React Native 0.79 (bare CLI, New Architecture) · React Navigation v7 · TanStack Query · Zustand · Reanimated`

github.com/Abdulmajidkhan007/lumina

- To‘liq tiplangan navigatsiya (native-stack + bottom-tabs) va strict TypeScript rejimi.
- Server holati AsyncStorage’da offline saqlanadi; formalar React Hook Form + Zod bilan validatsiyadan o‘tadi.
- Autentifikatsiya tokenlari react-native-keychain orqali xavfsiz saqlanadi.

3D Portfolio — Shaxsiy portfolio sayti

Veb / 3D

`React 19 · Three.js / React Three Fiber · GSAP · Tailwind v4 · Netlify`

abdullohkhan-portfolio.netlify.app

- O‘zim yozgan GLSL shaderlardagi zarrachalar maydoni: butun maydon bitta draw call’da, harakat va sichqonchaga reaksiya vertex shaderda hisoblanadi.
- WebGL bundle kritik yo‘ldan chiqarilgan (lazy + requestIdleCallback), shuning uchun boshlang‘ich JS ~17 kB gzip.
- Ikki tilli interfeys (uz/en), dark/light rejim va Netlify Forms orqali aloqa formasi.

TEXNIK KO‘NIKMALAR

Tillar	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworklar	React, React Native, Next.js, Expo, Vite
Holat	Redux Toolkit, Zustand, TanStack Query, React Hook Form + Zod
Uslublash	TailwindCSS, MUI, Bootstrap, NativeWind, React Native Paper
Animatsiya	Framer Motion, GSAP, Reanimated, Three.js / React Three Fiber
Vositalar	Firebase, Supabase, Turborepo, Git, GitHub, Netlify, Figma

TA’LIM

Pro Teach — Frontend dasturlash

Sentyabr 2024 — Avgust 2025

- Bir yillik to‘liq kurs: kompyuter savodxonligidan boshlanib, frontend dasturlash yo‘nalishi bilan yakunlandi.
- Dastur qamrovi — HTML5 va CSS3 (Flexbox, Grid, responsiv maketlar), JavaScript ES6+ (DOM, asinxron kod, fetch/REST), Git va GitHub bilan jamoaviy ish, so‘ngra React: komponentlar, props va state, hooklar, routing hamda holatni boshqarish.
- Har modul amaliy loyiha bilan yakunlangan; kurs davomida yig‘ilgan ishlar keyinchalik shaxsiy portfolioning va GitHub repozitoriylarimning asosini tashkil qildi.
- O‘qish tugagan oyda birinchi tijoriy loyihamni frontend dasturchi sifatida boshladim.
